## **DETAILED ACTION**

### ***Withdrawal of Finality***

1. In view of the new following art rejections, the finality of the outstanding office action has been withdrawn. Furthermore, claims 49 and 50 still remain, since they have not been formally requested to be cancelled.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 49 and 50 are rejected under 35 U.S.C. 102(b) as being anticipated by Marienfeld '206. Marienfeld discloses a reinforcing section 40 of tire treads 43 connected together to form a grid.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pulsifer '793 alone. Pulsifer discloses a retaining wall comprising a plurality of tires arranged in a plurality of courses 34, 36, 38, 40, 42, and 44. The tires may be filled with granular material such as soil or sand. As to the retaining wall being inclined to the

vertical and horizontal, any variant i.e. a degree or even a fraction of a degree in the slope of the ground would result in a retaining wall being inclined to both the vertical and horizontal. Therefore, it appears that unless the ground to which the tires are arranged is perfectly level, then the resulting wall would be inclined to both the vertical and horizontal.

***Allowable Subject Matter***

6. Claims 11-17, 19-42, 44-48, and 51-44 are allowed.
7. Claims 2, 3, and 7-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

8. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.
